Who we are

PwC's The New Equation is a community of solvers coming together in unexpected ways to build trust and deliver sustained outcomes.

We are a global and innovative firm that can offer clients integrated technology solutions, value based pricing and a unique holistic service that goes from strategy to execution.

Our relationship with SAP is pivotal to the PwC network. SAP is PwC's largest alliance and has been for the last six years. We have a strong and collaborative relationship with SAP in South Africa to bring the best of PwC and SAP to our clients.

What we do

Through our range of professionals across the PwC Africa network we offer in-depth technical and functional expertise. We help clients implement SAP technology solutions and rethink their IT landscape. We provide end-to-end services from strategy to execution, and bring you along the journey to achieving business outcomes.

Our biggest strength is bringing in the business lens to the leading technology provider in the world. This mindset, combined with practical experience, enables us to deliver SAP solutions safely.

We have learnt many lessons delivering transformation projects and we know that success is dependent on:

1

Project teams that comprise of subject matter experts that identify risks and issues holistically and address them early on

2

Strong governance and visible executive support for proper alignment and focus

3

Business and IT stakeholders that are empowered by their leaders to take decisive action

4

Tailored change management strategies that lead to proper communication and training.

We will deliver on our vision to be the market's most sought-after SAP services provider, recognised by the market for our unique ability to drive high-value outcomes for our clients through superior solutions and experience.

How PwC is different

Change that works for you

Transformation can give your business a competitive advantage—but only with change that amplifies your differentiation. Our deep, cross-industry expertise means our solutions fit your specific profile, and we work with you to empower change that sticks.

Get it done right the first time

You need to de-risk your digital transformation. We're a community of solvers that puts your new systems and processes to work, and we get it right straight out of the gate. Our proven track record for quality is your recipe for a successful transformation.

Accelerate breakthrough outcomes

It's not enough to implement new technology—technology needs to advance business objectives. Using investments we've already made, we take a human-led, tech-powered approach that starts with the desired business outcome and works backwards to build the tech.

Our service offering

Analytical transformation

With extensive experience managing enterprise data and implementing information-gathering tools such as SAP's S/4HANA, PwC can develop a customised data programme that meets the unique needs of your business. Don't just collect data, let PwC help you put it to good use.

Finance transformation

Digital transformation is for most employees, including chief financial officers (CFOs) who need to keep track of large amounts of sensitive finance data. Using SAP's S/4HANA, among other cloud-based solutions, PwC can help improve the real-time delivery of finance services, improve business performance monitoring, help CFOs better execute on company strategy and more.

Cloud transformation

PwC's Cloud Transformation Integrated Solution is a business-first approach to leveraging cloud. We start with the outcomes businesses need—new digital revenue streams, smarter ways of working, great customer experiences and rapid deal synergy.

PwC's services are designed to help clients leverage the benefits of cloud computing, such as scalability, agility and cost efficiency, while ensuring a seamless migration and optimization of their SAP systems in the cloud.

Procurement transformation

PwC's approach to SAP procurement transformation is based on a deep understanding of procurement best practices, industry trends and the latest SAP procurement solutions.

PwC can help clients transform their procurement function into a strategic, value-adding function that drives business performance and enables innovation.

Connected supply chain

Thanks to major technological advances including artificial intelligence, the Internet of Things and big data, companies can squeeze much more out of their supply chains than ever before. However, managing these increasingly complicated networks can be a challenge.

By implementing SAP supply chain solutions such as SAP Integrated Business Planning (IBP), SAP Ariba and S/4HANA, PwC can help customers automate and streamline their supply chain processes, increase efficiency and productivity, reduce costs and enable better collaboration with partners.

Risk and regulatory transformation

Once you've implemented game-changing technological solutions, you need to focus on getting the most out of your investment. We can unlock your technology to reach its potential.

Our risk and regulatory compliance team can help you identify any segregation of duty conflicts, look at how to balance access controls and productivity, monitor who gets access to confidential information and more.

Process mining

There are typical value extractors customers look for during a SAP S/4HANA implementation, e.g. real time insights, improved efficiencies, cost reduction, compliance and risk management, streamlined finance operations and procurement optimisation. PwC focuses on extracting value quickly through process mining professionals that are business focused and technically enabled. This approach results in less time revisiting business requirements and relevant business analysis, and provides actionable insights. A process mining platform can add value in all phases of transformations to S/4HANA and beyond.

Credentials

We combine our deep industry perspectives across the PwC Africa network and we are confident that we have the skills, capabilities and industry experience to help your company build trust and deliver sustained outcomes.

The team remains informed of new technologies offered by SAP through continued training investment and regular participation in SAP and PwC enablement sessions. Team members have formal SAP certification covering SAP solutions including SAP S/4HANA, SAP BTP, Signavio, IBP and GRC.

As a Platinum Partner, PwC is committed to our alliance with SAP and we have more than 22,500 dedicated SAP resources around the globe that specialise in SAP technology and solutions. PwC is proud to be a Validated RISE with SAP partner.

As a result of our long-term alliance and partnership, we receive significant recognition and dedicated account management support from SAP.
