

# SAP Systems Application and Products

Let's solve for the next generation

## Who we are

PwC SAP is part of a global alliance that provides advisory and consulting services and offers clients integrated technology solutions from strategy to execution.

## What we do

Through our range of professionals across the PwC Africa network we offer in-depth technical and functional expertise and we help clients implement SAP technology solutions and rethink their IT landscape. We provide end-to-end services from strategy to execution and bring you along the journey to achieving business outcomes.

Our biggest strength is bringing in the business lens to the leading technology provider in the world. South Africa is a very important market for SAP, where leading multinationals rely on us to help them through their digital journeys.

Leveraging SAP technology, PwC helps clients overcome business challenges including:

1

Complex ERP data structures

2

Lack of holistic data governance and management tools/processes

3

Reconciliation issues between various modules

4

Obtaining reliable forward views on sales, resource requirements and supply chain costs

5

Linking process and technology investment efforts to business outcomes.

## Our service offering

### Analytical transformation

With years of experience managing enterprise data and implementing information-gathering tools such as SAP's S/4HANA, PwC can develop a data programme that meets your business needs. Don't just collect data, let PwC help you put it to good use.

### Cloud transformation

Cloud-based technology is often nimbler, more intuitive and easier for staff to navigate than the cumbersome legacy systems so many businesses still employ. With SAP's cloud-based offerings, such as its S/4HANA Cloud platform, PwC can help drive better outcomes for your business.

### Finance transformation

Digital transformation is for most employees, including chief financial officers (CFOs) who need to keep track of large amounts of sensitive data. Using SAP's S/4HANA, among other cloud-based solutions, PwC can help improve the real-time delivery of finance services, improve business performance monitoring, help CFOs better execute on company strategy and more.

### Procurement transformation

The more efficient your procurement process, the more money you can save and the faster you can create and deliver your goods. PwC uses SAP Ariba, a cloud-based solution that helps standardise outsourcing and contract management processes while delivering crucial procurement insights. This powerful combination can help you generate more savings and run a more efficient operation.

### Risk and regulatory transformation

Once you've implemented game-changing technological solutions, you need to focus on getting the most out of your investment. We can get your technology to reach its potential. Our risk and regulatory compliance team can help you identify any segregation of duty conflicts, look at how to balance the inconvenience of access controls and productivity, monitor who gets access to confidential information and more.

### Connected supply chain

Thanks to some major technological advances including artificial intelligence, the Internet of Things and big data, companies can squeeze much more out of their supply chains than ever before. However, managing these increasingly complicated networks can be a challenge. PwC can help your company implement SAP's many supply chain solutions, which can help you realise savings and bring more products to market.

## Credentials

PwC is a platinum partner to SAP. Our global SAP practice is consistently ranked as one of SAP's top three S/4HANA Cloud partners, with a Certified Global Cloud Elite Partner status designation. As a result of our long-term alliance and partnership, we receive significant recognition and dedicated account management support from SAP.

We combine our deep industry perspectives across the PwC Africa network and we are confident that we have the skills, capabilities and industry experience to help your company build trust and deliver sustained outcomes.

## SAP Experience and Certifications

The team has extensive experience that covers

- Finance transformation, legacy modernisation i.e. SAP enterprise and data architecture, SAP ERP and SAP S/4 HANA, SAP Analytics Cloud (SAC) and SAP Enterprise Performance Management (EPM)
- Operations transformation i.e. digital supply chain, SAP Integrated Business Planning (IBP), SAP manufacturing and asset performance management
- Governance Risk and Compliance e.g. SAP GRC Access Control and Process Control.
- HR transformation i.e. SuccessFactors Employee Central.

The team remains informed of new technologies offered by SAP through continued training investment and participating in SAP enablement sessions. Team members have formal SAP certification covering SAP S/4 HANA Financials, RISE with SAP (Public Cloud), SAP Activate, SAP Signavio, SAP IBP, SAP BTP Integration Suite, and GRC Access Control.
