tessa.lavers@za.pwc.com

*The world is changing rapidly. Are the business models of the past fit for the challenges of today? Will they generate the 'good growth' that governments and society as a whole are increasingly demanding? What is expected from business and the landscape in which it operates have rarely been more complex or uncertain. It is no longer sufficient to simply measure financial profit. Consideration needs to be given to the financial stability and long term viability of organisations.*

*Understanding and integrating all environmental, economic and social issues into your long-term strategic plan in a way that creates lasting value for all, whilst also building public trust, is a common challenge for all types of organisations. At PwC we can assist in all facets of your integrated strategy.*
